WHAT I CAN DO FOR YOU

01 Build your IOS
intelligent OS – voice-in to dashboards-out. agents, skills, memory, the whole substrate. 4-6 wks.

02 Audit your existing one
you have agents but they drift. i find the leaks, name the parts, write the runbook.

03 Brief your team
60-90 min talk + Q&A. how a one-person IOS actually works under load.
